TWINING, INC. ACQUIRES STORMWATER CONSTRUCTION MANAGEMENT COMPANY
Services Offer Water Quality, Water Compliance, and Rain Event Project Performance

Long Beach, CA – January, 2013: Twining, Inc. is pleased to announce the acquisition of *Stormwater Construction Management (SCM)*, a new service offered by Twining, Inc. In our continuing effort to remain an industry leader in construction and engineering innovation, *Twining Stormwater Construction Management* will specialize in providing services such as water quality, stormwater compliance, and rain event project performance. These new services are coupled with Twining's 100+ years of quality experience.

Since 2002, SCM has specialized in all aspects of water quality and storm water compliance. With the acquisition of *Stormwater Construction Management*, Twining's stormwater services are enhanced through stormwater sampling and analysis, stormwater pollution prevention plans, stormwater site inspections, audits, and compliance services, and On-Site SWPPP management and SWPPP implementation.

Twining can now successfully implement effective erosion and sediment control practices at any stage of construction activities and for any rain event. The Twining stormwater team is composed of Qualified SWPPP Developers (QSD), Qualified SWPPP Practitioners (QSP) and SWRCB approved Trainer of Records. Twining's stormwater team is committed to providing stormwater compliance consulting and client satisfaction. Members individually have over ten years of experience in construction based stormwater consulting and regulatory compliance.

Twining has performed professional consulting services for many local owners, agencies and authorities. As a progressive step towards the future, *Twining Stormwater Construction Management* seeks to continue to be a visionary and leading force in the construction and engineering field.
